

Edouard Lemoalle

Partner

Description

Edouard advises suppliers and users of digital technologies, particularly in the telecommunications and automotive sectors.

He advises telecoms operators, IT integrators and car manufacturers in the context of their network, service or process deployment projects, on both regulatory and contractual aspects.

From the analysis and evaluation of the criminal risks of a project to the audit of its compliance with regulations (RGPD, CPCE, LPM, NIS), including the drafting and negotiation of the optimal contractual arrangement, Edouard offers practical and operational support.

Edouard has operational experience in the digital sector thanks to his responsibilities with telecom operators and his missions within an administrative authority (ARCEP).

Edouard regularly conducts seminars and trainings on data protection and cybersecurity.
