

Félicité Bidault

Lawyer

Description

Félicité Bidault joined Adaltys in January 2023.

She specializes in public business law (public contracts, public domainality, public and semi-public structures).

She assists public players and their private partners in structuring and implementing their public projects in the transport, infrastructure, construction and waste sectors.

In particular, her mission is to identify the most appropriate contractual arrangements for the implementation of public projects (study of possible implementation and operating methods: types of contract to be signed, dedicated structures to be created), then to support local authorities or their groupings in implementing the recommended contract award procedures (concession, DSP, public procurement, AOT/COT, etc.) or in creating public or semi-public structures (SEM, SPL, GIP).

She holds a Master's degree in transport law from the legal affairs department of the Grand Port Maritime de Marseille, and gained experience with Transdev Group. She regularly works in the transport sector (urban and suburban transport, ski lifts, rail transport, ports, etc.).
