

Maxime Castiglione

Lawyer

Description

Over the past several years, Maxime Castiglione has been involved in regulatory and operational urban planning as well as in planning law (joint development zones (ZAC- Zone d'aménagement concerté), housing estates).

He also advises on all matters relating to energy, for companies and public structures. This expertise enables him to work on the entire energy value chain (energy production, grid access, energy performance and efficiency)..

He also deals with all issues relating to public procurement (public contracts, concessions). In particular, he has developed specific expertise in auditing the award and execution of public contracts.

In the context of his various assignments, he assists several local authorities and private operators, both in terms of consulting and litigation before the administrative and judicial courts.

Formation
