

Digital, Data And Cybersecurity

Adaltys assists you in the fields of digital technology and in particular in the audit, negotiation and drafting of IT or telecom contracts, as well as training and advice on compliance with the RGPD.

Adaltys has developed a recognized legal and operational know-how in complex and constrained environments (telecommunications, airports, transport, freight logistics, automobiles, energy, OIV/OSE concerned by the LPM and the NIS directive) in areas of expertise: high-speed connectivity, traceability and mobility business solutions, connected vehicles, IoT in industrial environments and cybersecurity.

Adaltys' lawyers work in synergy with the various expertise and SS2I (PASSI, PDIS) required to assist you in the context of audit or control procedures and litigation, in France and internationally.
