

Dispute Resolution & Litigation

Litigation ... but not only that.

Indeed, our purpose is to assist you in all stages of managing the conflicts and tensions arising in the life of a company.

We assist our clients in the implementation of strategies designed to resolve difficulties as quickly as possible.

Tensions with a partner? Company liability at stake? A technical disaster (industry or construction)? Or a dispute with your business associates? Examples of situations in which you can rely on our support.

In the context of litigation, we assist our clients in the implementation of legal strategies ranging from emergency and protective measures, assistance before the judicial or arbitration courts, follow-up of expert appraisals and enforcement measures.

Upstream, we are involved in risk auditing, particularly criminal risk, or before strategic decisions are taken (breach of contract, resumption of activity).

And because most often the aim is to avoid litigation or to put an end to it before a court decision is taken, we help you in negotiations, whether in direct discussions or within the framework of an institutional conflict resolution process (mediation, conciliation).
