

Business Hardships & Restructuring

Hardship in business is not only about ... businesses in hardship.

Indeed, economic players are interdependent with their partners (customers, suppliers, banks) and collective proceedings affecting any one of them necessarily affect the others.

Our expertise covers a very wide range of interventions, from assistance to companies experiencing difficulties to assistance to creditors and partners as well as potential buyers.

We assist our clients in all phases of the proceedings (ad hoc mandate, conciliation, safeguard, recovery, judicial liquidation) by developing a strategy adapted to their objectives and constraints.

And because in this field more than in any other, time is a key factor, we do our utmost to demonstrate reactivity and flexibility in carrying out the actions defined in collaboration with our clients.
